INTRODUCTION

The Cornell National Social Survey (CNSS) is a survey of adults, age 18 and over, who are residents of the continental United States. The survey is managed, administered, and sponsored by the Survey Research Institute at Cornell University (SRI).

The 2013 CNSS was administered by phone. The phone sample, provided by Marketing Systems Group, is a Random Digit Dial (RDD) list drawn from the continental United States and includes cell phones. The sample selection procedure ensures that every household with a phone has an equal chance to be contacted and, once contacted, every adult in the household has an equal chance of being included in the study.

Telephone data collection began on August 7, 2013 and was completed November 2, 2013. All interviews were conducted in English using a Computer Assisted Telephone Interviewing (CATI) software system.

Questions for CNSS were submitted by researchers at Cornell and selected by the SRI Advisory Board. The prefix of each variable's name indicates the responsible faculty or researcher.
