### KMq3

#### **Condition A:**

Let's say there was an earthquake which you could feel but that resulted in no damage. How would you feel if it were caused by natural geological processes?

#### **Condition B:**

Let's say there was an earthquake which you could feel but that resulted in no damage. How would you feel if it were caused by disposal of wastewater produced by natural gas development into underground wells to support local energy needs?

#### **Condition C:**

Let's say there was an earthquake which you could feel but that resulted in no damage. How would you feel if it were caused by drilling three miles into the Earth to produce a renewable source of energy and heat for your local community?

#### **Condition D:**

Let's say there was an earthquake which you could feel but that resulted in no damage. How would you feel if it were caused by extracting groundwater from the Earth to irrigate crops in your local community?

#### **Condition E:**

Let's say there was an earthquake which you could feel but that resulted in no damage. How would you feel if it were caused by storing carbon dioxide captured from the atmosphere underground to help reduce climate change impacts in your local community?

- <1> Very negative
- <2> Somewhat negative
- <3> Slightly negative
- <4> Neutral
- <5> Slightly positive
- <6> Somewhat positive
- <7> Very positive
- <d> Do not know

### KMq4

How acceptable to you is this kind of earthquake?

- <1> Completely unacceptable
- <2> Somewhat unacceptable
- <3> Slightly unacceptable
- <4> Neutral
- <5> Slightly acceptable
- <6> Somewhat acceptable
- <7> Completely acceptable
- <d> Don't know
- <r> Refused

## KMq5

### **Condition A**

Let's say there was an earthquake, which you could feel but that resulted in no damage, and this earthquake was caused by a technology put into place only after there was a decision making process, which allowed people like you to have a voice in the decision. How acceptable to you is this kind of earthquake?

### **Condition B**

Let's say there was an earthquake, which you could feel but that resulted in no damage, and this earthquake was caused by a technology put into place only after the best scientists put their heads together, came up with a plan, and made the decision with little to no discussion with the local community. How acceptable to you is this kind of earthquake?

### **Condition C**

Let's say there was an earthquake, which you could feel but that resulted in no damage, and this earthquake was caused by a technology put into place only after procedures were carried out to allow people like you to appeal the decision if you did not support it. How acceptable to you is this kind of earthquake?

### **Condition D**

Let's say there was an earthquake, which you could feel but that resulted in no damage, and this earthquake was caused by a technology put into place only after the research data related to the decision were made freely accessible to the local community. How acceptable to you is this kind of earthquake?

### **Condition E**

Let's say there was an earthquake, which you could feel but that resulted in no damage, and this earthquake was caused by a technology put into place only after people like you were able to express your views to the people in charge of the decision. How acceptable to you is this kind of earthquake?

- <1> Completely unacceptable
- <2> Somewhat unacceptable
- <3> Slightly unacceptable
- <4> Neutral
- <5> Slightly acceptable
- <6> Somewhat acceptable
- <7> Completely acceptable
- <d> Do not know

### KBq1

How would your family rank the goal of making the power grid smart and reducing the dependency on coal-based power generation?

Interviewer note: The power grid is what brings electricity to your home from electrical generators like the ones at Niagara Falls.

- <1> Not important
- <2> Somewhat important
- <3> A top priority for New York State
- <4> No opinion
- <d> Do not know
- <r> Refused

### KBq2

One way to make the whole power grid smart is to install smart power meters in homes. This is a small device that replaces your wall thermometer. It can monitor the use of electricity in your home. A smart meter can also turn your home air conditioners, heaters and hot water boilers on and off to save money on your bills, and when this happens in a large number of homes, it can help make the power grid greener. But installing one costs a few hundred dollars. Which best describes your views?

- <1> I would not want a smart meter in my home
- <2> I would switch only if the power company covers the costs.
- <3> I would purchase a smart meter if it could help make the power grid greener.
- <4> I already have a smart power meter.
- <5> No opinion
- <d> Do not know
- <r> Refused

### KBq3

Some consumers worry that a smart meter could learn a great deal about their personal activities. Would you allow smart meter monitoring in your home?

- <1> No. I would not allow any smart meter device in my home.
- <2> Yes, but I do not want my data sent to the power company
- <3> Yes, and I would allow anonymous data to be sent to the power company
- <4> Yes, and I do not object to having my personalized data sent to the power company.
- <d> Don't know
- <r> Refused

### VPq1

How would you define “hospice care?”

- <1> Answer [specify]
- <d> Do not know
- <r> Refused

### VPq2

Palliative care is a type of medical care that is gaining in popularity. How would you define “palliative care?”

- <1> Answer [specify]
- <d> Do not know
- <r> Refused

### VPq3

Palliative care is specialized medical care for people with serious illnesses. It is focused on providing patients with relief from the symptoms, pain, and stress of a serious illness - whatever the diagnosis. The goal is to improve quality of life for both the patient and the family.

Palliative care is provided by a team of palliative care doctors, nurses and other specialists who work together with a patient’s other doctors to provide an extra layer of support. Palliative care is appropriate at any age and at any stage in a serious illness, and can be provided along with curative treatment.

How likely, if at all, would you be to consider palliative care for a loved one if they had a serious illness?

- <1> Very Likely
- <2> Somewhat likely
- <3> Not too/Not at all likely
- <d> Do not know
- <r> Refused
